## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Trans (US 2002/0181633 A1).

Trans teaches the Gigabit Ethernet apparatus with various encoding schemes. With respect to the claims below, references to the prior art appear in parenthesis.

1. *(original) An apparatus for use in multi-channel communication (Trans, Figure 1C) comprising: a physical layer entity (PHY) including a physical coding sublayer (PCS) transmitter circuit that is operative to generate a plurality of encoded symbols according to one of at least two transmission encoding schemes (Paragraph 0503); and wherein the PHY is operative to select between the at least two encoding schemes (Paragraphs 0525 and 0526).*

Art Unit: 2662

2. (currently amended) *The apparatus of claim 1 wherein one of the transmission encoding schemes is based on a 1000BASE-T standard (Paragraph 0526).*

3. (currently amended) *The apparatus of claim 1 wherein one of the transmission encoding schemes is based on a legacy encoding standard (Paragraph 0525, wherein 100BaseT is a legacy standard).*

### ***Allowable Subject Matter***

3. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 9-16 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to anticipate or make obvious the master/slave designation in association with the encoding scheme.
